PREFACE

This volume completes the thirty-ninth year of Industrial Arts Index, cumulating the monthly issues published from December 1950 thru November 1951.

Under the editorship of Marion E. Potter who has guided its progress from its inception, the Index has in these thirty-nine years, increased more than four-fold both in number of pages and in number of publications included; and it is due to Miss Potter's devotion to her work, a devotion that is still undiminished, that Industrial Arts Index occupies its present place in the field of library service.

During this year no new periodicals were added to the list and none dropped. Changes in titles of periodicals and other changes are noted as they occur in the announcement pages of current numbers of the Index and in the List of Periodicals indexed.

Miss Doris Dart's contribution to the chemical indexing is gratefully acknowledged.
